Isis & Osiris

An Immersive Dance Experience

WELCOME

We invite you to be part of Isis & Osiris, a theatrical choreographic project inspired by the magic and mythology of Ancient Egypt.

Rooted in captivating music and the sensual language of Arabic dance, this project goes beyond technique to embody story, femininity, strength, and presence. The choreography will be led by the project's founder, Leandro Ferreyra, with Isis Conde joining this edition as guest star and co-creator.

HOW THE PROJECT WORKS

You will receive video links with the full choreography and music.

Each video includes:

- Clear choreography explanations
- Demonstrations filmed from the front and the back
- Sections practiced with and without music

To keep everything simple and organized, in the videos, every participant is represented by a clearly marked dancer showing the name, group, and number, so you can easily follow your exact position in the choreography.

This system allows you to see your placement from both the front and the back, follow your part with confidence, and feel fully supported from learning to performance day.
